WORK EXPERIENCES

Business Intelligence Analyst | Full-time

Mar 2025 - Present
Hybrid • Gurgaon, India

Publicis Resources

- Developed SQL queries, views, and stored procedures for data extraction, validation, and analysis of large datasets, improving query performance by 30%.
- Built and maintained 15+ interactive Power BI dashboards, enabling stakeholders to monitor KPIs and drive data-driven decision-making.
- Designed scalable Star Schema data models and semantic models with optimized relationships, improving report performance and analytical accuracy.
- Performed UAT, data validation, and stakeholder testing for dashboard releases, achieving 100% reporting accuracy before production deployment.

Data Analyst | Full-time

Jul 2024 - Mar 2025
On-site • Ludhiana, India

Leeford Healthcare Ltd.

- Developed Power BI dashboards to track sales, manpower productivity, operational KPIs, reducing reporting effort by 40-50%.
- Analyzed 500K+ sales records to identify fraud and data inconsistencies, preventing incentive payout errors worth ₹1.2M+ monthly.
- Automated recurring reports using Excel VBA and Macros, reducing manual effort by 60% and improving reporting efficiency.

Junior Data Analyst | Full-time

Aug 2023 - Jul 2024
On-site • Delhi, India

KRAASA

- Analyzed ₹2Cr+ monthly sales and inventory data across 2,000+ SKUs using SQL and Power BI to drive demand planning and inventory decisions.
- Developed KPI-driven dashboards for sales performance, demand forecasting, and inventory management, improving reporting efficiency by 30%, increasing inventory visibility, and contributing to a 25–30% reduction in stock-out incidents through proactive inventory analysis.

PROJECTS

Publicis Pulse Engagement Survey | 📁 Publicis-Pulse-Survey

This project is about creating a Power BI dashboard that shows feedback received from clients through a survey called Publicis Pulse Survey. The survey is sent twice a year to understand how happy clients are with Publicis agencies.

- Developed a Power BI dashboard analyzing 25K+ survey responses across 90+ agencies and 70+ countries to track NPS and client satisfaction globally.
- Implemented wave-over-wave analysis to compare satisfaction trends and identify performance improvements and service gaps.
- Designed Region → Country → Agency → Client drill-down reporting, reducing analysis time by 40% and accelerating issue identification.
- Created service-line performance views across People, Delivery, Services, and Strategy, supporting targeted improvement initiatives.

UK Media Billing Cycle Time | 📁 UK-Media-Billing-Cycle-Time

The project aims to analyze how long it takes for billing to happen after a media campaign runs, and identify delays or inefficiencies in the process.

- Aalyzing 4.3M+ billing transactions, providing visibility into end-to-end billing KPIs and reducing cycle-time monitoring effort by 30%.
- Designed delay bucket analysis to identify overdue invoices and process bottlenecks.
- Built vendor performance dashboards to track billing delays and prioritize follow-ups, improving invoice resolution efficiency by 20%.
- Delivered transaction-level insights for Finance and Media teams, reducing manual tracking effort by 35% and improving cash-flow monitoring.
